

Stealth's Innovative Flat Racks Technology: The Future of Efficient Computing

Stealth is proud to present our cutting-edge Flat Racks Technology, a revolutionary approach to computing solutions designed for the modern demands of enterprise and industrial applications. Moving beyond traditional Rack Mount solutions, our Flat Rack configurations offer a powerful, space-saving alternative without sacrificing performance or functionality.

Our **Rack Drawers** embody our commitment to versatility, catering to a wide range of applications from telephony and industrial control to plant automation and data centers. This adaptability ensures that whatever your computing needs, Stealth's Flat Racks Technology is engineered to meet them.

The space-saving "FR Series" series contains a bright LCD monitor which offers premium picture quality options from 1080P Full HD to **4K** along with integrated keyboard and a touchpad mouse. We also offer multiple KVM ports and various Video input options to meet your specific application requirements. When in their resting position the ultra-thin device measures only **1U (1.75")** or **2U (3.5")** in height and installs easily into industry standard 19" rack cabinets.

Whether your application is for a data center, industrial environment, or military facility, we have a Rack Drawer solution to meet your needs.

Complementing these are our **Flat Rack Keyboards**, tailored to integrate seamlessly with your Flat Rack setup, providing a comprehensive computing solution that maximizes space and efficiency.

Stealth's Flat Racks Technology not only represents a leap in computing innovation but also underscores our dedication to offering solutions that align with our customers' evolving needs. Whether you're transitioning to a more space-efficient computing environment or customizing a solution for specific requirements, Stealth is here to support you every step of the way.
